I have extensive experience in both technical and non-technical supervision of teams of up to ten people. This has been developed on top of a strong technical foundation, which allows me to more effectively appreciate the technical concerns of my supervisees. I have spent large parts of my career making key decisions regarding the architecture and technical direction of services. I've led teams building multiple successful services, from the first line of code to delivery of the service and beyond. As well as this, I have excellent customer relations skills built up over many years of interactions with key stakeholders in the services for which I am responsible.

Professional Experience

| | |
|----------------------------------|--|
| August 2017 onwards | Netcraft Ltd , Bath, UK <i>Internet Services Manager</i> I lead a medium size team solely responsible for numerous critical services, supervising a mixture of full time staff and summer interns. I make significant contributions to architectural decisions for these services. I manage important customer relationships on a daily basis. I play a part in day-to-day service maintenance. I introduced daily stand-ups and one-on-one performance reviews to the company. |
| August 2014 — August 2017 | Netcraft Ltd <i>Internet Services Developer</i> I developed and improved a wide variety of services, mostly in the anti-phishing and anti-malware sectors, with a mixture of front-end and back-end work. |
| Summer 2013 | Netcraft Ltd <i>Internet Services Developer Intern</i> I enhanced and extended existing automated Internet services, and provided input towards developing new services. I received job offer during my internship. |
| Summer 2011 | smartFOCUS Group PLC , Bristol, UK <i>Software Engineer Intern</i> I created a suite of tools to scrape client data and collate client information for use by other software. |

Technical Skills

| | |
|------------------------------|---|
| Programming Languages | Perl, Scala, JavaScript |
| Version Control | Git |
| Operating Systems | Windows, Linux (Debian and RHEL-based) |
| Database Management | MySQL, PostgreSQL |
| Other | Microsoft Office, UNIX command line, \LaTeX |
